Gender: Male **Date of birth**: 12/06/2002 **Nationality**: Indian

ABOUT ME

Machine Learning Engineer with a strong foundation in AI/ML, deep learning, and backend development. Proficient in Python, C++, and CUDA, with expertise in LLMs, MLOps, and Kubernetes. Experienced in building AI-powered applications, deploying machine learning models, and developing scalable backend systems. Skilled in computer vision, NLP, and cloud-based AI solutions. Adept at problem-solving, optimizing model performance, and integrating AI solutions into enterprise environments. Passionate about innovation and leveraging technology to drive impactful solutions.

EDUCATION AND TRAINING

[21/10/2017 – 12/09/2018]

Secondary School (SSLC)

Alva's English Medium High School

City: moodbidre | **Country**: India |

[12/04/2019 – 21/07/2020]

Senior Secondary (12th)

Alva's PU Collage, Moodbidri

City: moodbidre | **Country**: India |

[20/04/2020 – 13/05/2024]

Bachelor's Degree

Mangalore Institute of Technology & Engineering

City: moodbidre | **Country**: India |

PROJECTS

[11/06/2023 – 20/01/2024]

Automated Data Extraction from Legal Documents Using OCR and NER

The system design diagram outlines an automated architecture for extracting data from legal documents using OCR and NER. Key modules include User Interface, OCR, NER, Data Processing, and Data Storage, enabling efficient, accurate data extraction and secure storage in a streamlined workflow.

[10/08/2024 – 27/09/2024]

Object Detection using Tensorflow

Developed an object detection model using TensorFlow, CUDA, and cuDNN, trained with the COCO API for real-time person and object detection.

[20/09/2024 – 03/10/2024]

Cold Email Generator(GENERATIVE AI)

Built a web-based Cold Email Generator using Streamlit and LangChain. Integrated LLMs (Llama Model 3.1) to extract job requirements and automate prompt-tuned email creation. Engineered a Portfolio class using ChromaDB to dynamically retrieve skills and project links.

Link: [https://github.com/shodhansshetty06/MyProjects/tree/main/Cold Email Generator](https://github.com/shodhansshetty06/MyProjects/tree/main/Cold%20Email%20Generator)

[13/10/2024 – 05/11/2024] **News Summarizer**

Developed a web-based application using Streamlit that fetches and summarize news articles using BeautifulSoup for web scraping and a pre-trained BART model from Hugging Face. Implemented a user-friendly interface with efficient model caching, showcasing skills in Python, NLP, and web scraping.

WORK EXPERIENCE

Shodhan kumar shetty

City: moodbidre | **Country:** India

[14/08/2023 – 16/10/2024] **MERN Stack Developer (Internship)**

I worked at **Acceler Lab Solutions** in Moodabidre as a **MERN Stack Developer** during my internship. During my time there, I developed the **Finance Expense Tracker**, a user-friendly web application designed to help users manage their personal finances effectively.

The project involved features like:

- **Income and Expense Tracking:** Allowing users to log their financial transactions in real-time.
- **Budget Setting:** Enabling users to set budgets and monitor their adherence to financial plans.
- **Expense Categorization:** Simplifying the organization of expenses into predefined categories.
- **Goal Setting and Monitoring:** Helping users define and track their financial goals.
- **Insightful Reports and Dashboards:** Providing users with visual insights into their spending patterns and financial progress.

This project aimed to enhance financial well-being by making financial management seamless and intuitive for users. My role included developing both the frontend using **React** and the backend services, integrating features to ensure smooth functionality and a user-friendly experience.

Shodhan Kumar Shetty

City: Udupi | **Country:** India

[04/04/2025 – Current] **Cloud Associate**

Managed and monitored cloud infrastructure, ensuring high availability and performance of deployed applications.

Worked on cloud operations including deployment, scaling, and troubleshooting of services on cloud platforms.

Assisted in automating operational workflows to reduce manual intervention and improve efficiency.

Analyzed system alerts and logs to identify issues, perform root cause analysis, and implement fixes.

Collaborated with cross-functional teams to maintain system reliability and support production environments.

Contributed to building alert-based monitoring solutions by integrating automation and machine learning concepts.

Supported incident management processes, ensuring timely resolution and minimal downtime.

Gained hands-on experience with cloud tools, monitoring systems, and debugging distributed applications.

SKILLS

Python (PyROOT, RDataFrame; ML: Keras, TensorFlow) | C, C++,C# | Python and Streamlit | Pytorch,Tensorflow | Databases: MySQL, MariaDB, PostgreSQL, MongoDB | vector db | Basic OpenCV | Kubernetes (beginner) | Kubernetes, Docker-Swarm | Basic knowledge of Django and Flask | CoreML | LangChain | Git | java | vector | DevOps, CICD Pipelines | MongoDB, PostgresSQL, SQL, NoSQL | gcp

CERTIFICATIONS

[Google, 03/12/2025]

Associate Cloud Engineer

Completed the Associate Cloud Engineer certification, building practical expertise in deploying and managing applications on GCP. Worked with services like Compute Engine, Cloud Storage, and IAM to design scalable and secure cloud solutions. Gained experience in monitoring, logging, and troubleshooting cloud infrastructure, along with implementing automation and cost optimization strategies.

Mode of learning: Work based
